

Introducing a world-class, fully integrated
**REVOLUTIONARY SOFTWARE
 MANAGEMENT SOLUTION**
 for printing and packaging professionals. ...

Selling, manufacturing, tracking and shipping have never been this easy!

▶ Call today and learn how the **INTRAPRINT™** interchangeable advantage will benefit you. Currently, over 250 enterprises in 15 different countries rely on this **unique** MIS software specifically designed for the graphic arts **professional**. With 25 years in the industry, we will revolutionize your business!

Optimized estimating

Price quotes may be generated for any machine in the printing plant in a matter of seconds.

Considered the backbone of **INTRAPRINT™**, the estimating module is currently one of the most effective systems available. This path-to-customer and job-oriented solution simultaneously takes into account every operation cost. All pricing and finishing options are included. The system's ability to produce accurate, fully integrated production success with every job.

Optimized estimating

Order entry & job setup

Inventory control

Finished management

Gang-run intelligence

Armed with the ability to queue jobs, schedule and print similar, low-lead jobs, customers will always measure press sheets and profit. By using **INTRAPRINT™**'s gang run management feature, through this intelligent calculator online, information based on product, ton, quality, type, content, bleed, gain/direction, work and turn, work, as well as tandem requirements, each enhancement is automatically factored into the equations (overriding industry or the highest level).

Customer relationship management

Shop floor data collection

Delivery management/logistics

Invoicing

Accounting

JDFActiveLink™

The **JDFActiveLink™** software module allows users to generate all the data needed to create and feed it directly into production equipment, immediately when a new order is received, eliminating every stage of production.

Web Services

Scheduling

Costing

Payroll

Papertesting™
 DRDS Paper Scanning Solution (RSS™) allows you to scan and analyze paper quality in real time with a comprehensive next-generation barcode based tracking system.

A customizable web-to-print software saves time and money by allowing end users the ability to request a quote, create an order, confirm product availability, and track the status of their order. **INTRAPRINT™ 24/7™** includes a personalized company website, complete adaptation of company or additional solution modules ranging from sales and marketing to production and shipping, and full production plans to shop floor job management.
